

DOCKET NO.: AHP 98298-P4 / WYBI-0010
Application No.: 09/400,492
Office Action dated December 8, 2005

PATENT

REMARKS

The December 8, 2005 Office Action deemed this application to be in condition for allowance except for formal matters, and prosecution on the merits was closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 215. The specification was objected to for introducing new matter by amendment to the specification with two paragraphs setting forth cross references to related applications. Specifically, the second of the two paragraphs contained an error in naming U.S. Provisional Application No. 60/110,033 by incorrectly referring to it as 60/11,033, thereby introducing new matter into the specification.

In accordance with the present Amendment, the specification has been amended to now correctly refer to U.S. Provisional Application No. 60/110,033. Accordingly, the objection to the specification should now be overcome.

The Office Action further requested the related application data to be updated. The presently amended paragraphs also contain updated information on the status of the referenced patent applications.

Applicants submit that the present application is now in condition for allowance.

Respectfully submitted,

Janet E. Reed, Ph.D.
Registration No. 36,252
